Support with energy access and energy efficiency. Better public transport. More car sharing. Access into woodland, paths locally	10/24/2022 2:47 PM
29	*A refurbished Y Plas. Its a great hub of many different community activities as well as visiting productions/workshops/training- with the largest indoor covered space. And is clearly in demand and regularly booked out. But the hall/vortex/bar area/entrance to the hall in particular could be significantly improved by a refurb to make a better and more attractive entrance, welcoming lobby/bar area with up and coming events billed, and big windows views in and out of the hall space. This would be for both me and my family, but as a person that organises lots of local and national events through my work, I would love to see this a more welcoming, dynamic and functional space that people would love to visit, and with activities clearly going on to the public, inviting them in.	10/24/2022 1:04 PM

35	Not for me but my nephew died of taking poor MDMA at age 20 in 2019. I would like to see a film made of his experience. I have access to professional actors, producers, directors that can be called on and obviously the story. This could be taken around the schools in drugs 'workshops'. Basically because something has to happen to stop the County Lines from destroying life in this country because the police are doing nothing and even the courts have overruled that the drug dealer is responsible for the death of someone he's dealt drugs to. Callum was a well liked young man with a great personality. A great hard hitting film could be made with the right funding.	10/16/2022 10:02 PM
